(54) **Curtain track system.**

(57) A curtain track system comprises a flexible, plastics material track member (10), having in a rear surface thereof a central longitudinal lipped groove (14) and upper and lower longitudinal lipped channels (37) at opposite sides thereof, a ball chain (38) retained in the channels (37) and extending over rollers (18) in end caps (12) at respective opposite ends of the track member, support brackets (16) releasably securable to the track member at said groove (14) by operating from the front of the track

member a manually operable pivotal catch (25), and upper and lower master gliders (39, 40) mounted on the track member and releasably securable to respective upper and lower runs of the ball chain in said channels (37) by operation at the front of the track member of manually operable pivotal members (50) which each have a free rear end with a 'vee' notch (53) for engaging the ball chain (38) between a pair of adjacent balls thereof and trapping it towards an inner surface of one of said channels.

CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone		E : earlier patent document, but published on, or after the filing date	
Y : particularly relevant if combined with another document of the same category		D : document cited in the application	
A : technological background		L : document cited for other reasons	
O : non-written disclosure			
P : intermediate document			
T : theory or principle underlying the invention		& : member of the same patent family, corresponding document
