(54) Title: GEL COMPOSITION

(57) Abstract: The present invention relates to a stable, post-foaming gel composition for use in personal cleansing which is able to enhance the sensory experience for a consumer by remaining adhered to the consumer's skin for longer before being washed off, enabling greater levels of, for example, skin moisturisation and fragrance, to be delivered to the skin, and is also able to exhibit enhanced stability and clarity.

\* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
