1 May 2014

(54) Title: RAILWAY

FIG. 1

(57) Abstract: Railway comprising rails (1) that are at least in part at regular places along their longitudinal direction supported by and mounted on baseplates (2), wherein each baseplate (2) is fixed to a sleeper resting on ballast, and wherein each rail (1) is clamped to the baseplate (2) with a clamping plate (3) that is fitted to the baseplate (2) with a clamping bolt (4), and which clamping plate (3) has opposite extremities (3', 3'') of which a first extremity (3') rests on a cam (5) provided on the baseplate (2) and a second extremity (3'') rests on and presses the rail (1) to the baseplate (2), wherein the first extremity (3') and the cam (5) have first contact surfaces (5') and the second extremity (3'') and the rails (1) have second contact surfaces, wherein the first contact surfaces and the second contact surfaces each have imaginary perpendicular lines that cross each other at an imaginary centre line of the clamping bolt.

# INTERNATIONAL SEARCH REPORT

International application No  
PCT/NL2013/050543

A. CLASSIFICATION OF SUBJECT MATTER  
INV. E01B9/46 E01B9/48  
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)  
E01B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EP0-Internal, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

| Category* | Citation of document, with indication, where appropriate, of the relevant passages                                       | Relevant to claim No. |

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

\* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance  
"E" earlier application or patent but published on or after the international filing date  
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)  
"O" document referring to an oral disclosure, use, exhibition or other means  
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
