(54) **Title:** MULTI-SCREEN HOLD AND PAGE-FLIP GESTURE

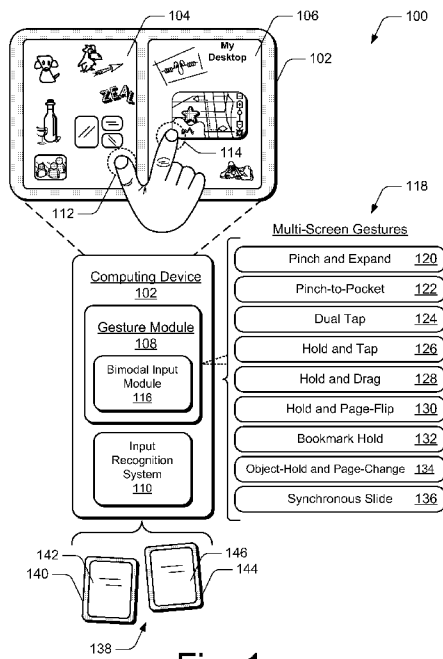

Fig. 1

(57) **Abstract:** Embodiments of a multi-screen hold and page-flip gesture are described. In various embodiments, a hold input is recognized at a first screen of a multi screen system, and the hold input is recognized when held to select a journal page that is displayed on the first screen. A motion input is recognized at a second screen of the multi-screen system, and the motion input is recognized while the hold input remains held in place. A hold and page-flip gesture can then be determined from the recognized hold and motion inputs, and the hold and page-flip gesture is effective to maintain the display of the journal page while one or more additional journal pages are flipped for display on the second screen.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
