(54) **Duster flat support**

(57) It is a flat device for dusting including a laminar carrying structure with an end connected to a handle.

The laminar carrying structure is of a long shaped type, with reduced width and limited thickness.

Said laminar carrying structure has a lamina properly stiffened by ribs, and equipped on the long sides with

elastically yielding elements, convex toward the outside, coplanar to the flat face of the lamina, so as to tense the active part of the lining, inside which it is placed.

Furthermore, such laminar carrying structure has one completely flat face and plates with star-shape fissures, so that disposable paper serviettes also can be used.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 02 1642

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
