(54) Title: INTRAOCULAR LENS

(57) Abstract: An accommodating intraocular lens (200, 300, 400) has an anterior portion (102) including an anterior viewing element (106) and an anterior biasing element (108) connected to the anterior viewing element (106). A posterior portion (104) has a posterior viewing element (118) and a posterior biasing element (120) connected to the posterior viewing element (118). The anterior and posterior biasing elements (108, 120) are connected at first and second apices (112, 116). First and second distending members (134, 136) are connected to the posterior portion (104). The first and second distending members (134, 136) extend to locations significantly anterior of an anterior side of the posterior viewing element (118).

INTERNATIONAL SEARCH REPORT

PCT/US2005/012032

A. CLASSIFICATION OF SUBJECT MATTER
A61F2/16

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
A61F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
