

**Claims**

1. A container comprising:  
a body having a bottom and a side wall defining a reservoir;  
a collar attached to a top end of said body;  
a removable seal at the top end of said body to seal the reservoir; and,  
a lid hingedly engaged with said collar, said lid having an underside and  
configured to provide a docking station on the underside for holding a measuring  
device.
2. The container of claim 1 wherein the side wall is a cylindrical sleeve attached at one  
end to the bottom and at the other end to the collar.
3. A container of claim 1 or claim 2 further comprising a leveling bar at the top end of  
said body.
4. The container of any of claims 1-3, wherein a tamper strip is disposed on said side  
wall, which visibly indicates the volume or condition of the contents in the container  
to a user.
5. The container of any of claims 1-4, wherein a tamper evident band is disposed on a  
portion of the lid.
6. The container of any of claims 1-5, wherein the lid and collar are constructed from a  
plastic material.
7. The container of claim 6, wherein the lid and the collar are connected together by a  
butterfly hinge and are molded as one piece.
8. The container of any of claims 1-7, wherein the removable seal is a metal or polymer  
foil.
9. A container for holding powdered or granulated infant formula comprising: a body  
having a bottom and a cylindrical side wall defining a reservoir;  
a collar attached to a top end of said body;  
a leveling bar at the top end of said body;  
a removable seal at the top end of said body to seal the reservoir; and,  
a lid hingedly engaged with said collar, said lid having an underside and  
configured to provide a docking station on the underside for holding a measuring  
device.
10. A container as in claim 9 further comprising a measuring device designed to fit into  
the docking station, wherein said measuring device is a scoop comprising a bowl  
and a handle affixed to the bowl.
