(54) Title: USER INTERFACE FEATURES FOR AN ELECTRONIC DEVICE

FIG. 9D

(57) Abstract: A method is provided for controlling a display device of an electronic device. A data field may be displayed on the display device. An editing process may be executed that provides for editing of the data field displayed on the display device. The data field on the display device may be magnified relative to other portions of the display device when selected for editing according to the editing process.

WO 2009/005958 A3

(84) **Designated States** (*unless otherwise indicated, for every kind of regional protection available*): ARIPO (BW, GH, GM, KE, LS, MW, MZ, NA, SD, SL, SZ, TZ, UG, ZM, ZW), Eurasian (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LT, LU, LV, MC, MT, NL, NO, PL, PT, RO, SE, SI, SK, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).

**Published:**

- *with international search report*
- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*

(88) **Date of publication of the international search report:**

26 February 2009

# INTERNATIONAL SEARCH REPORT

International application No PCT/US2008/066299
---

**A. CLASSIFICATION OF SUBJECT MATTER**  
 INV. G06F3/048      G06F19/00      G06F1/16      G06Q10/00

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
 G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 2007/109325 A1 (EVELEIGH SIMON F [GB]) 17 May 2007 (2007-05-17) abstract; figures 1-10 paragraphs [0001], [0037] - [0040], [0044], [0046] - [0050], [0052], [0059], [0060], [0063], [0065], [0067], [0075]	1-11
X	US 6 909 439 B1 (AMRO HATIM YOUSEF [US] ET AL) 21 June 2005 (2005-06-21) abstract; figures 1-7 column 2, lines 11-18 column 5, line 34 - column 7, line 9 ----- -/--	1-4

Further documents are listed in the continuation of Box C.

See patent family annex.

\* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*&\* document member of the same patent family

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/US2008/066299

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3.  Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1.  As all required additional search fees were timely paid by the applicant, this international search report covers allsearchable claims.
2.  As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.
3.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.  No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-11

### Remark on Protest

- The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- No protest accompanied the payment of additional search fees.

# INTERNATIONAL SEARCH REPORT

International Application No. PCT/US2008 /066299

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-11

Invention 1 (claims 1-11) directed towards a method of controlling a display device (essentially) comprising:  
(i) magnifying the data field of a parameter selected for editing and providing a scroll functionality to incrementally increase (resp. decrease) the displayed parameter value with constant or variable increment step sizes.

---

2. claims: 12-19

Invention 2 (claims 12-19) directed towards an electronic device (essentially) comprising:  
(ii) a transceiver, a display, and a housing, wherein the housing defines a first integral window positioned over the transceiver and a second integral window positioned over the display.

---

3. claims: 20-25

Invention 3 (claims 20-25) directed towards an electronic analyte measuring device (essentially) comprising:  
(iii) an analyte measuring facility for measuring an analyte concentration in a sample.  
(iv) a display device configured to display instructions to measure via said analyte measuring facility an analyte concentration in a subsequent sample if the analyte concentration in the current sample is outside of a predetermined limit.

---

4. claims: 26-27

Invention 4 (claims 26-27) directed towards an electronic blood glucose measuring device (essentially) comprising:  
(iii) an analyte measuring facility for measuring an analyte concentration in a sample.  
(v) a processor executing a bolus recommendation process and a display device configured to display instructions to measure via said analyte measuring facility blood glucose of a blood sample if a carbohydrate value entered by the user exceeds a predefined limit.

---

5. claims: 28-30

# INTERNATIONAL SEARCH REPORT

International Application No. PCT/US2008 /066299

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Invention 5 (claims 28-30) directed towards a method of setting and managing an automatic reminder (essentially) comprising:

(vi) starting and resetting of a timer in response to an occurrence of an event of interest and activating a notification device when the timer times out.

---

6. claims: 31-32

Invention 6 (claims 31-32) directed towards an electronic analyte measuring device (essentially) comprising:

(iii) an analyte measuring facility for measuring an analyte concentration in a sample.

(vii) a plurality of user buttons and a processor configured to disable said user buttons during an ongoing analyte measurement, and to enable them when the analyte measurement is complete.

---
