(54) **Title:** IMPROVED CLINICAL EFFECT OF PHARMACEUTICAL PRODUCTS USING COMMUNICATION TOOL INTEGRATED WITH COMPOUND OF SEVERAL PHARMACEUTICAL PRODUCTS

(57) **Abstract:** The invention relates to a combination of N substances, wherein $N > 1$, with pharmaceutical activity against at least one medical condition for use in a treatment of said at least one medical condition in combination with a computer program product (110) comprising instructions causing a computer to perform a method comprising the steps providing a patient (102) with a set of questions (107) according to a question schedule, wherein said set of questions is adapted to said combination of substances; providing a patient with N sets of questions ($106_1, \dots, 106_N$) according to N question schedules, wherein each set of questions is adapted to one of the substances in said combination; collecting answers to said sets of questions from said patient; subjecting the answers to said set of questions (107) adapted to said combination of substances to a set of functions (109), thereby generating a first patient specific feedback information; subjecting the answers to said sets of questions ($106_1, \dots, 106_N$), each adapted for one of the substances in said combination, to N sets of functions ($108_1, \dots, 108_N$), thereby generating a second patient specific feedback information; and providing said first and second patient specific feedback to the patient.
