(54) **Burglar-proof hinge for doors and windows**

(57) A burglar-proof hinge for rotatably connecting a wing (5) of a window/door of a room to the respective frame (4) comprising a first hinge element (1) connected to the frame (4) of the window/door, a second hinge element (2) connected to the wing of said window/door and a pin (3) pivotally connecting said first and said second hinge elements to each other. The frame has a lip (8a)

extending parallel to the median plane of said window/door at the second hinge element and on the side of the frame turning outwardly from the room and a fin (12) extends from the second hinge element, parallel to the median plane of the window/door, suitable for abutting from the inside on the edge when the window is in a closed condition and for opposing to any outward traction on the wing.
