UNITED STATES PATENT OFFICE.

WILLIAM NANCE LEWIS, OF ABINGDON, ILLINOIS.

DESIGN FOR A BRUSH-HANDLE.

SPECIFICATION forming part of Design No. 33,821, dated January 1, 1901.
Application filed December 3, 1900. Serial No. 23,523. Term of patent 14 years.

To all whom it may concern:

Be it known that I, WILLIAM NANCE LEWIS, a citizen of the United States, residing at Abingdon, in the county of Knox and State of Illinois, have invented and produced a new and original Design for a Brush-Handle, of which the following is a specification.

This invention relates to a design for a brush-handle, and the essential feature resides in the design illustrated in the accompanying drawings, wherein—

Figure 1 is a perspective view of a brush-handle embodying the feature of the design. Fig. 2 is a side elevation of the same.

The numeral 1 designates the upper member, composed of a plurality of closely-arranged spiral convolutions 2, reducing toward their lower termination and continuing into a loop 3, having a longitudinal concavo-convex form. The loop is also disposed at an inclination, and the said upper member is tubular.

Having thus described the invention, what is claimed as new is—

The design for a brush-handle, herein shown and described.

In testimony that I claim the foregoing as my own I have hereto affixed my signature in the presence of two witnesses.

WILLIAM NANCE LEWIS.

Witnesses:
S. R. UNDERWOOD,
L. E. CUTLER.
