(54) **Perfected wire protector-guide**

(57) The invention refers to a protector formed by a piece of plastic or similar material capable of carrying out two functions, firstly, providing splash-proof protection, and secondly, guiding a wiring bundle. It is formed basically of an eminently trunco-tetrapyramidal body consisting of two halves which fold onto one another by virtue of being joined by a hinge, the bases of this body having an eminently cylindrical opening which allows the wire bundle to pass through and into the inside of the protector, the bundle being conducted towards a connector which will be locked in place by the bottom part of the protector.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 50 0250

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
