(54) Title: SOLAR ENERGY GENERATOR

Fig.1

(57) Abstract: Solar energy generator, which comprises a plurality of concave mirrors (1,1') suitable for reflecting, in an operative position in which they are oriented toward the sun, the solar rays (2) toward a collector (3), wherein in an ideal operative position the solar rays (2), before they are reflected by the concave mirrors (1,1'), are parallel to a reference axis (R) passing across the collector (3), wherein in this ideal operative position the concave mirrors (1,1') are arranged between the source of the solar rays (2) and the collector (3) so as to reflect most of the solar rays (2) toward the collector (3) with angles (a) comprised between 80° and 180°.

A. CLASSIFICATION OF SUBJECT MATTER

INV. F24J2/10

ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

F24J

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
