William H. Peabody.
Letters Patent

1315X

The Schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said William H. Peabody himself of his machine for cleaning different sorts of Grain and Seeds.

A cylinder barrel to stand perpendicular and stationary, with a shaft standing perpendicular and passing through the center of the same, with arms extending from the shaft in two or more opposite horizontal directions with fingers through said arms pointing perpendicularly upwards and downwards, with similar arms and fingers made fast to the inside of the barrel, and extending towards the shaft in four or more directions, the article wanted to be cleaned must be put into the top of the cylinder and pass down through the same. The shaft with its arms and fingers are to be turned with men, cattle or water, as shall be found most expedient, the barrel, shaft arms and fingers, are to be of such dimensions, and to come as nearly in contact when the shaft is in motion, as shall be found necessary, to produce the friction wanted to clean the different kinds of articles intended to operate upon.
