(54) Title: CARD CONNECTOR AND PORTABLE TELEPHONE HAVING THE SAME

(57) Abstract: A card connector includes a base member and two sets of contact members which are provided on the base member. One end of the contact members serves as joining portions with respect to a circuit board of a portable telephone. The other ends of the contact members serve as contact portions with respect to a card. The joining portions are respectively disposed at mutually opposite ends of the base member. The contact portions are bent in a chevron shape and have terminations in a card fitting direction.
