- (54) Title:** METHOD AND APPARATUS FOR AUGMENTING AN IMAGE OF A LOCATION WITH A REPRESENTATION OF A TRANSIENT OBJECT

FIG. 4

- (57) Abstract:** A method, apparatus and computer program product are provided in order to augment an image of a location with a representation of a transient object. In the context of a method, an image of a location to be presented is identified. The method also includes identifying a transient object that is not in the image of the location, but that is anticipated to be at the location during at least one period of time. The method further includes causing the image of the location to be presented with augmentation that provides a representation of the transient object. A corresponding apparatus and computer program product are also provided.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
