BACKGROUND OF THE INVENTION

[0004] 1) Field of the Invention

[0005] Present invention relates to an improve pill bottle or container to have less moisture with safety in mind.

[0006] 2) Description of Related Art

[0007] Many bottle or container which contain pills sensitive to moisture, have drying substance in a paper or plastic package with the pill inside of bottle or container. It is not a safe way to put these two item together because in the event of swallowing the drying substance could put that person in danger, good example of these are one of medicine bottle in the market today.

SUMMARY OF INVENTION

[0008] Present invention bottle or container having attachable net configure container inside of bottle or container. When drying substance is securely put in a net configure container and securely glued or attached to bottom of bottle

or container, it solved the problem of accidental swallowing of the drying substance because it will never leave the bottle or container.

BRIEF DESCRIPTION OF THE DRAWINGS

[0009] FIG. 1 View of bottle container with net container inside.

DESCRIPTION OF THE PREFERRED EMBODIMENT

[0010] FIG. 1 shows traditional bottle 25 with pills 23 has net configure container 24 inside of bottle 25. Net configure container 24 can be attach by glue directly on the bottom of bottle 25 or click in by locking track 21 and locking groove 22.

[0011] Although the invention has been described and illustrated in detail, it is to be clearly understood that the same is by way of illustration and example, and is not to be taken by way of limitation. The spirit and scope of the present invention are to be limited only by the terms of the appended claims.

I claim:

1. A bottle or container used for medicine pill comprising: a cap with bottle or container wherein pills are stored; said bottle or said container having a container inside of said bottle or said container wherein said pills are stored.
2. A bottle or container of claim 1, wherein said container inside of said bottle and said container having a attachment system.
3. A bottle or container of claim 2, wherein said container inside of said bottle and said container having substance inside of said container.
