(54) Information displaying apparatus and information providing system using the same

(57) An information receiving and displaying apparatus 1 is installed at a place such as a lobby of a hotel or airport, a waiting room of a hospital, or the like where the public keep staying for a while. The apparatus comprises a signal receiving section and an information display section, and has a video display function as well. The signal receiving section receives both of text information such as commercial messages transmitted from a text information transmitting apparatus 2 disposed within a text information transmission control center via a public telephone line 100 and desirable text information (text news, weather reports, and the like) superposed on a public wave 200 from a TV station 3, and one kind of these data is selectively displayed on the information display section. The text information is displayed on an electric light display panel in a scrolling fashion, whereby viewers can see the information about commercial messages and the like as well as the information such as text news and weather reports.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 99 10 5795

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
