Title: COSMETIC COMPOSITION COMPRISING A POLYMER BEARING A CARBOSILOXANE DENDRIMER UNIT AND EXPANDED POLYMER PARTICLES

Abstract: The present invention relates to a cosmetic composition for making up and/or caring for keratin materials, in particular the skin, in the form of a water-in-oil emulsion comprising, in a physiologically acceptable medium, at least one vinyl polymer bearing at least one carbosiloxane dendrimer-based unit, and at least 0.5% by weight of expanded polymer particles relative to the total weight of the composition.

Further documents are listed in the continuation of Box C.  

* Special categories of cited documents:

- **A**: document defining the general state of the art which is not considered to be of particular relevance
- **E**: earlier application or patent but published on or after the international filing date
- **L**: document which may throw doubts on priority claim(s) or which cited to establish the publication date of another citation or other special reason (as specified)
- **O**: document referring to an oral disclosure, use, exhibition or other means
- **P**: document published prior to the international filing date but later than the priority date claimed
- **T**: later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- **X**: document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- **Y**: document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- **Z**: document member of the same patent family
