To all whom it may concern:

Be it known that I, TYLER CALHOUN, a citizen of the United States, residing at Ridgetop, Robertson county, State of Tennessee, have invented and produced a certain new and original Design for a Spoon, of which the following is a specification.

My design for a spoon is fully shown in the accompanying drawings, in which—

Figure 1 is a perspective view, and Fig. 2 is a central longitudinal section, of a spoon embodying my design.

The essential or leading feature of my design consists of a spoon, substantially as shown in the accompanying drawings.

Referring to the drawings, the numeral 1 indicates the bowl of a spoon, which bowl is surmounted at the rear by a hood 2. The front edge of the hood is formed on a graceful curve 5, as shown, which merges at each side into the edges of the bowl of the spoon at 6, thus forming a curve of parabolic nature. The outer contour of the hood is a symmetrically curved surface, as shown, and the handle extends tangentially from the curved surface of the rear portion of the bowl at or near the junction of the hood with the bowl at the rear.

The handle 3 is bent into a circular open loop, the end 4 terminating a short distance from the shank of the handle, as clearly shown in Fig. 2.

Having thus described my invention, what I claim, and desire to secure by Letters Patent, is—

The design for a spoon, as herein described and illustrated in the accompanying drawings.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

TYLER CALHOUN.
