(54) Title: WIPES DISPENSER NOZZLE

FIG. 1

(57) Abstract: One embodiment for dispensers for dispensing wet wipes includes a container, a plurality of wet wipes contained within the container and a dispensing nozzle made of a resilient material secured to the container. The dispensing nozzle includes an outlet opening in the nozzle. A fluid retaining member is located at a point below the opening. Another embodiment includes a container for holding a plurality of wipes. A dispensing nozzle includes a resilient member having an outlet opening is secured to the container. A fluid retaining member is located below the outlet. In one embodiment, the fluid retaining member has a surface that is sloped. Embodiments of dispensing nozzles for wet wipes are also disclosed wherein the dispensing nozzle includes a resilient dome shaped member having an opening located therein. In addition, the dispensing nozzle includes an annular fluid retaining member. The annular fluid retaining member may have a sloped surface.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
