(54) Title: LIGHT-ACTIVATED MULTI-POINT DETACHMENT MECHANISM

(57) Abstract: Implantable devices, such as vaso-occlusive coils or stents, are described. The devices include multiple detachment points, where each detachment point is activated (e.g., detachment) by application of a different wavelength of electromagnetic radiation (e.g., light). In this way, the operator can select the desired point of detachment and/or the order in which the device is deployed. Methods of making and using these devices also from an aspect of this invention.

INTERNATIONAL SEARCH REPORT

In ational Application No PCT/US 01/47662

a. classification of subject matter IPC 7 A61B17/12

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

 $\begin{array}{ccc} \text{Minimum documentation searched (classification system followed by classification symbols)} \\ \text{IPC 7} & \text{A61B} \end{array}$

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
