(54) Title: MULTIPLE-RESOLUTION AUDIO AND VIDEO SYSTEMS, METHODS OF PRODUCTION, DELIVERY AND USES THEREOF

FIG. 3

(57) Abstract: A multiple-resolution audio and video system is disclosed that includes: at least one shared network infrastructure; at least one audio file, video file or a combination thereof, wherein each of the at least one audio file, video file or combination thereof has at least one resolution format and wherein one of the at least one resolution format is a studio quality resolution; at least one executable user interface application; and at least one device that accesses the at least one executable user interface application. Methods of using a multiple-resolution audio and video system include: providing at least one shared network infrastructure; providing at least one audio file, video file or a combination thereof, wherein each of the at least one audio file, video file or combination thereof has at least one resolution format and wherein one of the at least one resolution format is a studio quality resolution; providing at least one executable user interface application; and utilizing at least one device to access the at least one executable user interface application. Devices and related software applications are also contemplated herein.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
