(54) Title: PEPTIDES THAT ARE CAPABLE OF BINDING TO AMYLOID-BETA PEPTIDE.

(57) Abstract: The present invention relates to novel peptides capable of binding to amyloid- β peptide, wherein the N α -atom of at least one amino acid residue is substituted with a substituent sterically hindering further binding of amyloid- β peptide. The invention further relates to use of such peptides in medicine and to pharmaceutical compositions for treatment of Alzheimer's disease.
