DESIGN.

E. WESTON.

MAGNET.

No. 19,896. Patented June 10, 1890.
To all whom it may concern:

Be it known that I, Edward Weston, of Newark, Essex county, New Jersey, have invented and produced a new and original Design for Magnets, of which the following is a specification.

My design relates to a magnet of the so-called horseshoe form; and it consists in the novel and distinctive configuration of the middle portion the parts B and C of the bar converge, and then beyond the parts B C the end portions D and E appear parallel. The angles F G, between the parts B D and C E, are rounded.

I claim—

The design for a magnet, substantially as herein shown and described.

Edward Weston.
