Term: 14 Years

Filed: May 15, 2013

The ornamental design for a display device for tire pressure monitoring system with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a display device for tire pressure monitoring system with graphical user interface showing our new design;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a right side elevational view thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is an enlarged view of graphical user interface shown removed from the display device thereof; and, FIG. 6 is an enlarged view of an alternate embodiment of the graphical user interface shown removed from the second display screen thereof.

The broken lines showing of the display device illustrate the environment of the claimed design and form no part of the claimed design.
