Grant Hughel

By Joseph Martin,

attorney.
To all whom it may concern:

Be it known that we, ALLEN H. GILLESPIE and GRANT HUGHEL, citizens of the United States, residing at Anderson, in the county of Madison and State of Indiana, have invented and produced a certain new and original Design for a Bracket, of which the following is a specification.

Figure 1 is a view in side elevation of our shade-bracket, and Fig. 2 a plan view of same.

Similar letters of reference indicate like parts throughout both views of the drawings.

As shown in the drawings, the leading or material feature of our design consists of a body A, having the square-cornered edges ab and cb at right angles to each other and the lower front corner of the body rounded to form an approximate quarter-circle from a to c. The top edge ab, approximately midway of its length, has the slot G, which extends diagonally toward the front for approximately half of its length and is thence projected vertically in a downward direction to its end. The edge cb has the rearwardly-projecting screw-threaded extension H.

Having thus described our invention, what we claim as new, and wish to secure by Letters Patent, is——

The design for a bracket as herein shown and described.

In witness whereof we have hereunto set our hands and seals, at Anderson, Indiana, this 29th day of October, A. D. 1898.

ALLEN H. GILLESPIE. [L. S.]
GRANT HUGHEL. [L. S.]
