(54) **Perimetral protection apparatus, particularly for anti-break-in systems**

(57) The present invention refers to a perimetral protection apparatus, particularly for anti-break-in security systems, comprising an electronic barrier that can be positioned near an opening located between a first area and a second area. The electronic barrier features at least one sensor for detecting the transit of a person or object through the opening. Furthermore, the perimetral protection apparatus comprises means for determining the direction of transit through said electronic barrier.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 00 9165

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
