54 Device at shelter.

57 Shelter intended to be arranged in a slope with an end side (2) projecting out of the slope. At the end side (2) the shelter body is provided with a door and a V-shaped protective wall (4) with the apex of the V turned away from the shelter. The V-shaped protective wall is a top and bottom connected with the shelter and on both sides is an opening between the protecting wall and the shelter end side for passage to and from the shelter.
