UNITED STATES PATENT OFFICE.

TARGE G. MANDT, OF STOUGHTON, WISCONSIN.

DESIGN FOR AN EVENER-IRON.

SPECIFICATION forming part of Design No. 35,108, dated September 17, 1901.
Application filed August 12, 1901. Serial No. 71,839. Term of patent 7 years.

To all whom it may concern:

Be it known that I, TARGE G. MANDT, a citizen of the United States, residing at Stoughton, in the county of Dane and State of Wisconsin, have invented and produced a new and useful Design for Evener-Irons, of which the following is a specification.

My invention relates to a new and useful design for evener or doubletree irons, of which the following is a specification, reference being had to the accompanying drawings, forming part thereof, in which—

Figure 1 is a perspective of my iron. Fig. 2 is a transverse vertical section of the same.

Like numerals of reference designate like parts in both views.

The numeral 1 designates the back-bar of my iron, which bar is perforated at 2. Face-plates 3 are connected centrally the bar 1 and extend about one-third the length thereof. These face-plates are elliptical in outline, extend parallel, and are perforated at 4. Parallel perforated ears 5 jut out from the bases of the face-plates and are rounded at 6 on the arc of a circle.

The essential or material features of my design are the back-bar 1, the parallel elliptical plates 3, and the rounded perforated ears 5.

Having described my invention, what I claim as new, and wish to secure by letters Patent, is—

The design for an evener-iron, substantially as shown and described.

In testimony whereof I have hereunto set my hand in presence of two subscribing witnesses.

TARGE G. MANDT.

Witnesses:

EDWARD F. CAVERLY,
BENNETT S. JONES.
