(54) Title: VIDEO PROCESSING SYSTEM

(57) Abstract: A method and apparatus for producing video content. The method includes acquiring video data from a source (102). If the video data is not digitized, then the video data is digitized. The method includes generating scene indexes for the video data including a representative still image for each scene and combining the video data and scene indexes along with a media player (110) on a video disc. The video player (110) is operable to play the video data in accordance with the scene indexes including playing a scene from the video data on a client computer (108) while displaying the representative stills for other of the scenes available for display on the video disc.
