(54) Title: A ROLLED COOKIE MACHINE

FIG.1

(57) Abstract: The present invention generally relates to a machine for preparing a rolled jam tart. The present invention comprises of mechanisms for compressing the dough and the jam, and filling the jam inside the rolled compressed dough. The mechanism involved is co-extrusion mechanism. The present invention also aided with a sensor for cutting the tart automatically and uniformly.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
