UNITED STATES PATENT OFFICE

RUFUS WRIGHT AND JAMES H. RACE, OF BROOKLYN, NEW YORK.

IMPROVEMENT IN CHIMNEY OR GLOBE HOLDERS.

Specification forming part of Letters Patent No. **141,478**, dated August 5, 1873; application filed May 13, 1873.

To all whom it may concern:

Be it known that we, RUFUS WRIGHT and JAMES H. RACE, of the city of Brooklyn, in the county of Kings and State of New York, have invented certain new and useful Improvements in Gas-Globe or Lamp-Chimney Retainers; and we do hereby declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it pertains to make and use it, reference being had to the accompanying drawings, which form part of this specification.

Our invention relates to an improvement in the method of securing globes or lamp-chimneys to their galleries.

In the drawings, Figure 1 is a perspective view of our invention as detached from its gallery. Fig. 2 represent the operation of our invention as securing the globe or chimney, and Fig. 3 the same as releasing the globe or chimney.

Said invention consists as follows: The ordinary gallery A is provided with two stationary retainers, B. The sliding retainer C, as shown in detail at Fig. 1, when brought against the stationary retainers B, leaves the gallery A virtually provided with but two retainers, and in this condition the globe or chimney may easily be removed or adjusted,

and, when adjusted, may be firmly secured by sliding the movable retainer C a suitable distance away from the stationary retainer B.

We are aware that galleries of lamps have been provided with sliding clamps or retainers for the chimney or globe, but necessitating in their application the provision of a slot or some further change in the gallery-frame.

The object of my invention is to provide a clamp for the globe or chimney so constructed that it may be attached to any of the open-ring galleries now in use without altering any of the parts as now constructed.

Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is—

The lamp-chimney or globe securer, consisting of a single metallic clip embracing the gallery-frame, so constructed, substantially as described, that without alteration of the parts it may be attached to any open-ring gallery.

In testimony that we claim the foregoing we have hereunto set our hands this 10th day of May, 1873.

RUFUS WRIGHT.
JAMES H. RACE.
