- (54) Title: UNIVERSAL RAMEN COOKING CONTAINER

Fig. 2

- (57) Abstract: The invention provides a container for cooking ramen style block noodles, the container comprising a main body having a generally rectangular base, two generally parallel and spaced side walls connected to the base and two generally parallel and spaced end walls connected to the base and to the side walls, the tops of the side walls and the end walls forming an upper rim. The container is dimensioned so that between about 7 and about 9 ounces of water will fill a container holding a typical 3 ounce mass of ramen style block noodle to a level equal to the top of the noodle mass.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
