(54) **A pin coupling for the connection of co-axial cables**

(57) The invention discloses a pin coupling (1) for the connection of co-axial cables (6, 7) which comprises: a male terminal (2) and a female terminal (3) each of which is connected with one of said co-axial cables. Said male terminal (2) presents an opening (22) provided with a lateral surface (122) having a profile converging inside the male terminal (2) itself, suited to

lodge the connector (5) of said female terminal (3). The angle of inclination (222) of said lateral surface (122), in combination connection between said terminals (2, 3), should at least one of said terminals be released before the locking to its corresponding terminal occurs.
