(54) **Title:** SYSTEM FOR STRUCTURED COMMUNICATION BETWEEN PARTIES

FIG. 4C

(57) **Abstract:** A system may comprise a remotely-accessible controller configured to present a user interface to one or more of the parties; and a state information repository to be updated throughout a transaction, wherein changes in the state information are constrained at least in part based upon a transaction type determined from a predetermined set of transaction types; wherein the controller is configured to initiate an electronically mediated interaction pertinent to a communication transaction between the parties, attempt to establish an initial context for the transaction based upon previous electronically-mediated interactions that include the initiating party, establish a defined role for each of the parties, each role defining bounds upon the activity of each party within the transaction, and, upon advancement of the state information from a first state to a second state, engage associated parties through the user interface.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
