(54) Title: MOBILE TERMINAL AND METHOD FOR CONTROLLING THE SAME

(57) Abstract: The present invention discloses a mobile terminal capable of controlling a main display area via an auxiliary display area implemented by a flexible display. In particular, according to the present invention, the mobile terminal includes a sensing unit configured to detect a movement of the mobile terminal, a display unit configured to contain a main display area exposed to the front side and an auxiliary display area exposed to the side and a controller, if the detected movement satisfies a prescribed condition, configured to control the display unit to switch to an image sharing mode, the controller, if the mobile terminal enters the image sharing mode, configured to control the display unit to output image data on the main display area and output a thumbnail list for a plurality of images on the auxiliary display area.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
