DESIGN.

No. 34,998. Patented Aug. 27, 1901.

S. R. SLAYMAKER & G. M. MILLER.

PADLOCK.

(Application filed July 20, 1901.)
UNITED STATES PATENT OFFICE.

SAMUEL R. SLAYMAKER AND GEORGE M. MILLER, OF LANCASTER, PENNSYLVANIA; SAID MILLER ASSIGNOR TO SAID SLAYMAKER.

DESIGN FOR A PADLOCK.

SPECIFICATION forming part of Design No. 34,998, dated August 27, 1901.

Application filed July 20, 1901. Serial No. 60,157. Term of patent 7 years.

To all whom it may concern:

Be it known that we, SAMUEL R. SLAYMAKER and GEORGE M. MILLER, citizens of the United States, and residents of Lancaster, in the county of Lancaster and State of Pennsylvania, have invented and produced a new and original Design for Padlocks, of which the following is a specification.

In the accompanying drawing, which forms a part of this specification, the figure is a perspective view showing our new design.

As shown in the drawing, the leading or material feature of our design consists of the rectangular body A, the peaked upper end B, and the loop or shackle D, having its ends engaging the top of the slopes of the opposite sides of peaked upper end B. The base a of body A and the top plate b of peaked end B project both at the ends and sides beyond the faces of the ends and sides of said parts A and B, and the edges thereof are smooth surfaces, while the sides and ends of parts A and B are roughened.

Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is—

The design for a padlock, as herein shown and described.

In testimony whereof we have signed our names to this specification in the presence of two subscribing witnesses.

S. R. SLAYMAKER.

GEO. M. MILLER.

Witnesses:

C. G. BASSLER,
WM. R. GERHART.
