(54) Title: DEVICE FOR DISPLAYING AND ILLUMINATING AN IMAGE

FIG. 1A

(57) **Abstract:** Some embodiments may include a device for displaying and illuminating images. The device may include a housing including an interior portion. An opening in the housing may provide access to the interior portion. A viewing aperture may be formed in the housing. The device may include a light guide having a light source. The light guide may be removably received within the housing via the opening. The device may include a graphic medium with an image printed thereon. The graphic medium may be removably received within the housing via the opening and guided via a guide surface disposed on a portion of the light guide. The graphic medium may be guided via the guide surface and positioned with respect to the light guide such that at least a portion of the image is viewable through the aperture and at least partially illuminated via light originating from the light source.
