UNITED STATES PATENT OFFICE.

ASBERRY C. JACKSON, OF ORANGE, TEXAS.

IMPROVEMENT IN COMBINED DISH AND CLOTHES WASHER.

Specification forming part of Letters Patent No. **181,075**, dated August 15, 1876; application filed May 22, 1876.

To all whom it may concern:

Be it known that I, ASBERRY C. JACKSON, of Orange, Orange county, Texas, have invented a new and Improved Combined Dish and Clothes Washer and Dish-Drainer, of which the following is a specification:

My invention consists of a detachable clothes-washing attachment for a sink, and a tilting shelf, upon which dishes may be placed for draining off the water into the sink. The wash-pan and the draining-shelf are surrounded on the sides and top by a cabinet-case, which is located in this relation thereto for convenience in storing away the dishes.

Figure 1 is a front elevation of my improved washing and draining apparatus; and Fig. 2 is a sectional elevation of the same, taken on line *xx*, Fig. 1.

Similar letters of reference indicate corresponding parts.

A is a sink of any approved kind, over which the dish-pan B is pivoted at C, for convenience in dumping out the water. D is a pin, by which the pan is fastened in upright or inverted position. F is a board for washing clothes, which is detachably connected to the

pan by the blocks G, which are boxed onto the front of the sink at H, and fastened by a key, I. J is the draining-shelf, on which the dishes are placed after being washed. It is pivoted at K, so as to raise and lower at the front, and buttons L are pivoted under it to hold it either in a level or inclined position. M is the case surrounding the sides and top of the wash-basin, to be located in such relation to it as to afford the greatest convenience in handling the dishes.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

1. The combination of the inclined wash-board F, notched supporting-blocks G, and key I, as shown and described.

2. The draining-shelf J, pivoted to the frame at K, in combination with the pivoted blocks L, the whole being arranged substantially as shown and described.

ASBERRY CHAPMAN JACKSON.
