(54) **Title:** MANAGING AGGREGATION AND SENDING OF COMMUNICATIONS

- (57) **Abstract:** Techniques are described for managing communications between client applications and remote recipients, such as remote Web services or other network services. In at least some situations, the techniques include providing client communication management systems on each of multiple client computing devices to manage communications being sent from and/or to one or more client applications executing on the client computing device, and/or providing server communication management systems on each of multiple server computing systems to manage communications being sent from and/or to one or more network services provided by the server computing system. A communication management system on a computing device or system may aggregate communications being sent to one or more remote recipients from one or more local applications or services, and then send a group of multiple aggregated communications together to the remote recipient when the communication management system determines that one or more predefined criteria are satisfied.

**PCT/US2007/084360****A. CLASSIFICATION OF SUBJECT MATTER****G06F 15/16(2006.01)i, G06F 17/00(2006.01)i**

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

G06F 15/16; H04L 7/00; G06F 15/167

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKOMPASS(KIPO internal) &amp; Keywords: one or more applications, one or more services, aggregation of requests, aggregation of responses.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
