The present invention provides a compound of formula (I): Said compound is inhibitor of aldosterone synthase and aromatase, and thus can be employed for the treatment of a disorder or disease mediated by aldosterone synthase or aromatase. Accordingly, the compound of formula (I) can be used in treatment of hypokalemia, hypertension, congestive heart failure, atrial fibrillation, renal failure, in particular, chronic renal failure, restenosis, atherosclerosis, syndrome X, obesity, nephropathy, post-menopausal dial inflammation, coronary heart diseases, inflammation, increased formation of collagen, fibrosis such as cardiac or myocardial fibrosis and remodeling following hypertension and endothelial dysfunction, gynecomasia, osteoporosis, prostate cancer, endometriosis, uterine fibroids, dysfunctional uterine bleeding, endometrial hyperplasia, polycystic ovarian disease, infertility, fibrocystic breast disease, breast cancer and fibrocystic mastopathy. Finally, the present invention also provides a pharmaceutical composition.
