| (54) Title: CORPORATE INFORMATION COMMUNICATION AND DELIVERY SYSTEM AND METHOD INCLUDING ENTITLABLE HYPERTEXT LINKS | | |
| (57) Abstract An integrated computer-implemented corporate information delivery system (Fig. 1). A database stores research reports produced by and received electronically from brokerage firms. Authorization information specifies who is authorized to access each research report. The database also stores corporate information about a number of corporations. Each item of corporate information is produced by and received electronically from one of the corporations about that corporation. Authorization information specifies who is authorized to access each item of corporate information. A research delivery module (10) allows a user to submit a query and receive query results listing research reports and corporate information satisfying the query and that the user is authorized to access. A corporate register module (12) outputs according to a common format. The corporate information may be distributed via the Internet. | | |
