(54) Title: ORGANIC BIOCIDAL DECONTAMINATION COMPOSITIONS

(57) Abstract: Organic decontamination compositions and methods of use thereof are provided which include a biocide fraction dispersed in a substantially non-aqueous carrier and having less than about 10% by weight water. The biocide fraction is preferably consisting of biocidally effective organic peroxides, oxides, aldehydes, phenols, napthas and acids, quaternary ammonium compounds, transition metal salts, the halogens, compounds containing a halogen, N, S or B atom, ozone and mixtures thereof. The carrier advantageously includes a component different than the biocide fraction and selected from the group consisting of straight or branched chain, substituted or unsubstituted halogenated C3-C15 hydrocarbons, CI-C12 straight or branched chain alkyl alcohols, and mixtures thereof.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
