(54) Title: SEALING AND RETAINING CABLE ATTACHMENT FOR TELECOMMUNICATIONS CLOSURES

(57) Abstract: There is provided a cable attachment for sealing and retaining cables entering an opening of a telecommunications closure. The cable attachment includes an adapter body (12) with an opening through which the cable (24) passes; and a grip device (50) and grommet device (16) are also located within the opening of the adapter body for strain relieving and sealing, respectively, the cable passing through the adapter body. The cable attachment further includes a bolt portion (20) that is selectively moveable relative to the adapter body for applying a force to the grommet device for selectively creating a seal about an outer surface of the cable. Alternative designs for sealing and/or strain relieving cables entering a closure are provided.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"Z" document member of the same patent family
