UNITED STATES PATENT OFFICE.

JOHN N. TODD, OF DALLAS, TEXAS.

DESIGN FOR A MUD-SCRAPER.

SPECIFICATION forming part of Design No. 35,943, dated October 29, 1901.

Applications filed August 10, 1901. Serial No. 71,660. Term of patent 14 years.

To all whom it may concern:

Be it known that I, JOHN N. TODD, a citizen of the United States, residing at Dallas, in the county of Dallas and State of Texas, have invented and produced a new and useful Design for Mud-Scrapers, of which the following is a specification.

My invention relates to new and useful designs in mud-scrapers, of which the following is a specification, reference being had to the accompanying drawings, forming a part thereof, in which—

Figure 1 is a perspective view of my scraper. Fig. 2 is a plan view of the same.

The body of my scraper is designated by the numeral 1 and is of uniform contour and rectangular in cross-section. The forward end of the body is curved to form an arm 2, extending at an obtuse angle to the body, inclined to the vertical, and beveled on one side at 3 to a knife-edge. The rear end of the body is turned through an arc of a quadrant and perforated at 1°.

The leading or material feature of my design is the uniform body, having on one end a beveled arm inclined to the vertical and extending at an obtuse angle thereto, the other end of said body being turned through the arc of a quadrant.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a mud-scraper, substantially as shown and described.

In testimony whereof I have hereunto set my hand in presence of the subscribing witnesses.

JOHN N. TODD.
