(54) Title: TICKET TRANSFER

FIGURE 1

(57) **Abstract:** A system and method transfers a ticket from one party to another through a ticketing application in a computing device. A purchased ticket may be electronically received by the user and saved to a database accessible by the computing device. The ticket may be assigned a unique fingerprint to prevent fraudulent activity. The ticketing application receives a selection of one or more tickets to be transferred to another party. A transfer recipient (having access to the ticketing application) is identified. In one embodiment, a user may request a payment amount from the transfer recipient for the transferred ticket. Once a user has identified a transfer recipient and payment amount (if applicable), the user may then confirm and/or authorize the transfer.
