- (88) Date of publication of the international search report:

31 December 2003

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: METHOD FOR AUTOMATED WEB SITE MAINTENANCE VIA SEARCHING

(57) Abstract: A method for adding HTML documents to a web site involves the addition of HTML keywords to each HTML document. One HTML keyword is provided per category of information. A search for each category of information is determined, and the searches are to be performed by a search engine. When a category on the web site is selected, a search engine is called to execute the search corresponding to the selected category of information. The search is not visible to a user of the web site. An up-to-date web page is presented for the selected category of information. The up-to-date web page includes a hypertext reference having a link to each pertinent HTML document this is identified by the search.
