(54) Title: INTERACTIVE ELECTRONIC SIGNAGE SYSTEM AND METHOD OF OPERATION FOR AN AIRCRAFT

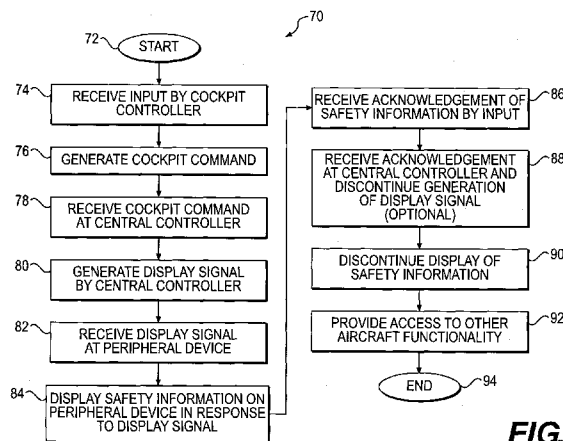

FIG. 5

(57) Abstract: A signage display system for an aircraft includes a controller for receiving input and generating a command, a central controller connected to the controller, the central controller receiving the command and generating a display signal responsive to the command, at least one peripheral device connected to the central controller, the peripheral device receiving the display signal prompting the device to display safety information, an input associated with the peripheral device for receiving an acknowledgement of the safety information and generating an acknowledgement signal responsive to the acknowledgement, such that display of the safety information is discontinued in response to receipt of the acknowledgement. A method and set of instructions also are provided.
