(54) **Improved doll producing catarrh simulating effects**

(57) It has the particularity that it allows the emitting of elongated bodies (8) which simulate nasal secretions, through the nasal fossas of the nose (7) when the doll is in vertical position thanks to the action of a plastic body which has a metallic counterweight (11), being it possible to move the tongue (13) by means of a pacifier, a feeding bottle nipple or a toy thermometer of the adequate size. The doll can also make sounds resembling sneezing and weeping when a push button (5) located at the belly is grazed or air is introduced inside the doll by external means such a toy syringe through the holes (2) located at several spots of the doll, such as the arms (6) or the buttocks.
